CMPE 101-Intermediate Programming Quiz-06

Problem

Write down outputs of the following class

```
class Quiz_06

    public void numbers(int n, int m) {
        for (int i = n; i < m; i++) {
            if ( i % 2 == 0 ) {
                System.out.println( i );
            }
        }
    } // end of the number-method

    public void numbers2(int [ ]n) {
        for (int i = 0; i < n.length; i++) {
            if ( n [i] % 2 == 0 ) {
                System.out.println( n[i] );
            }
        }
    } // end of the number2-method

    public static void main(String [ ] args) {
        Quiz_06 q= new Quiz_06();
        int [ ] t= { 1,8,3,14,6,32,70,8,9,13};
        q.numbers(7,25);
        q.numbers2(t);

    } // end of the main method

} // end of the class
```
